

04 Explore Ethereum

Jonathan Knudsen

jonathan.knudsen@duke.edu

Fall 2019

Goals

- Browse the Ethereum blockchain
- Learn about Solidity
- Experiment in a test Ethereum environment

Steps

1. Find an interesting dApp by browsing the Ethereum blockchain
 - a. One browser is <https://etherscan.io/>
 - b. Try **Blockchain** > **Verified Contracts** in the menu
2. Copy the source and paste it into <https://remix.ethereum.org/>
3. Build it (you probably need to adjust the compiler version)

Submission

Your submission should include the following items:

1. Ethereum address of the dApp
2. Source code of the dApp
3. ABI of the dApp
4. Bytecode of the dApp
5. Describe what this dApp does if possible
