

06 Explore Ethereum

Goals

- Examine the Ethereum blockchain

Questions to Answer

Use <https://etherscan.io/> to see details about blocks and transactions on the Ethereum blockchain.

1. Find block 11928275. How many transactions are in this block?
2. Two of these transactions are to a contract named “USD Coin”. What are the transaction hash values for these two transactions?
3. Examine one of the transactions you identified in Question 2. What message (function) is called on the contract?
4. What is the Ethereum address for “USD Coin”?
5. Examine the “USD Coin” contract.
 - a. In which block was it created? Provide the block number.
 - b. Which transaction created the contract? Provide a transaction hash.
 - c. When was that block mined?
